PART NO. 9371972084-02
1. SAFETY PRECAUTIONS

- Let the customer keep this installation manual because it is needed when the air conditioner or remote controller is serviced or moved.

**WARNING**
This mark indicates procedures which, if improperly performed, might lead to the death or serious injury of the user.

- For the air conditioner to operate satisfactorily, install it as outlined in this installation manual.

- Do not turn on the power until all installation work is complete.

**CAUTION**
This mark indicates procedures which, if improperly performed, might possibly result in personal harm to the user, or damage to property.

- Do not install where there is the danger of combustible gas leakage.

- Do not install near heat sources, steam.

3. INSTALLING THE REMOTE CONTROLLER

3.1. Load batteries (R03/LR03 x 2)

(1) Press and slide the battery compartment lid on the reverse side to open it. Slide in the direction of the arrow while pressing the mark.

(2) Insert batteries. Be sure to align the battery polarities (+/−) correctly.

(3) Close the battery compartment lid.

**CAUTION**
- Take care to prevent infants from accidentally swallowing batteries.

- When not using the Remote Controller for an extended period, remove the batteries to avoid possible leakage and damage to the unit.

- If leaking battery fluid comes in contact with your skin, eyes, or mouth, immediately wash with copious amounts of water, and consult your physician.

- Dead batteries should be removed immediately and disposed of properly, either in a battery collection receptacle or to the appropriate authority.

- Do not attempt to recharge dry batteries.

**NOTES**
- Never mix new and used batteries, or batteries of different types.
- Batteries should last about 1 year under normal use. If the Remote Controller’s operating range becomes appreciably reduced, replace the batteries and press the RESET button with the tip of a ballpoint pen or other small object.

3.2. Installing the remote controller holder

**CAUTION**
- Check that the indoor unit correctly receives the signal from the remote controller, then install the remote controller holder.

- Select the remote controller holder selection site by paying careful attention to the following: Avoid places in direct sunlight. Select a place that will not be affected by the heat from a stove, etc.

1. REMOTE CONTROLLER HOLDER INSTALLATION

- Install the remote controller with a distance of 7 m between the remote controller and the remote control signal receiver as the criteria. However, when installing the remote controller, check that it operates positively.

- Install the remote controller holder to a wall, pillar, etc. with the tapping screw.
(1) Mount the holder.

(2) Set the remote controller.

(3) To remove the remote controller (when use at hand).

4. FUNCTION SETTING

Perform the "FUNCTION SETTING" according to the installation conditions using the remote controller.

Entering the function setting mode

- While pressing the FAN button and SET TEMP. (▲) simultaneously, press the RESET button to enter the function setting mode.

STEP 1

Selecting the remote controller signal code

Use the following steps to select the signal code of the remote controller. (Note that the air conditioner cannot receive a signal code if the air conditioner has not been set for the signal code.)

The signal codes that are set through this process are applicable only to the signals in the FUNCTION SETTING. For details on how to set the signal codes through the normal process, refer to 5. SELECTING THE REMOTE CONTROLLER SIGNAL CODE.

1) Press the SET TEMP. (▲) (▼) button to change the signal code between $R \cdot b \cdot c \cdot d$.

Match the code on the display to the air conditioner signal code. (initially set to $R$)

(If the signal code does not need to be selected, press the MODE button and proceed to STEP 2.)

2) Press the TIMER MODE button and check that the indoor unit can receive signals at the displayed signal code.

3) Press the MODE button to accept the signal code, and proceed to STEP 2.

The air conditioner signal code is set to $A$ prior to shipment. Contact your retailer to change the signal code.

The remote controller resets to signal code $A$ when the batteries in the remote controller are replaced. If you use a signal code other than signal code $A$, reset the signal code after replacing the batteries.

If you do not know the air conditioner signal code setting, try each of the signal codes ($R \cdot b \cdot c \cdot d$) until you find the code which operates the air conditioner.

STEP 2

SELECTING THE FUNCTION NUMBER AND SETTING VALUE

Refer to the indoor unit installation manual for details on the function numbers and setting values.

Selecting the function number and setting value

1) Press the SET TEMP. (▲) (▼) buttons to select the function number.

(Press the MODE button to switch between the left and right digits.)

2) Press the FAN button to proceed to setting the value.

(Press the FAN button again to return to the function number selection.)

3) Press the SET TEMP. (▲) (▼) buttons to select the setting value.

(Press the MODE button to switch between the left and right digits.)

4) Press the TIMER MODE button, and START/STOP button, in the order listed to confirm the settings.

5) Press the RESET button to cancel the function setting mode.

6) After completing the FUNCTION SETTING, be sure to turn off the power and turn it on again.

   44
10) External input control
    46
11) Room temperature control switching
    48

*1: It is effective only to install IR Receiver unit.

1) Filter sign
The indoor unit has a sign to inform the user that it is time to clean the filter. Select the time setting for the filter sign display interval in the table below according to the amount of dust or debris in the room. If you do not wish the filter sign to be displayed, select the setting value for “No indication”.

   Setting description | Function number | Setting value
   -------------------|-----------------|-----------------
   Standard           | 00              | 00              | 03
   Long interval      | 01              | 01              | 02
   Short interval     | 02              | 02              | 01
   No indication      | 03              | 03              | 00

The filter sign interval time is different according to Indoor unit type as follows.

   Setting description | Compact Cassette | Slim Duct | Compact Wall Mounted | Wall Mounted
   -------------------|-----------------|----------|----------------------|--------------
   Standard           | 2,500 hours     | 400 hours|                      |              |
   Long interval      | 4,400 hours     | 1,000 hours|                   |              |
   Short interval     | 1,250 hours     | 200 hours|                      |              |

2) Ceiling height
Select the setting values in the table below according to the height of the ceiling.

   Setting description | Function number | Setting value
   -------------------|-----------------|-----------------
   Standard (2.7m)    | 20              | 00              | 01

3) Outlet directions
Select the setting values in the table below for using a 3-way outlet.

   Setting description | Function number | Setting value
   -------------------|-----------------|-----------------
   No                 | 40              | 00              | 01

4) Static pressure
Select appropriate static pressure according to the installation conditions.
Please refer to the installation manual of each indoor unit for details.

5) Cooler room temperature correction
Depending on the installed environment, the room temperature sensor may require a correction.
The settings may be selected as shown in the table below.

   Setting description | Function number | Setting value
   -------------------|-----------------|-----------------
   Standard           | 00              | 00              | 03
   Slightly Lower control | 01              | 01              | 02
   Lower control      | 02              | 02              | 01
   Warmer control     | 03              | 03              | 00

6) Heater room temperature correction
Depending on the installed environment, the room temperature sensor may require a correction.
The settings may be changed as shown in the table below.

   Setting description | Function number | Setting value
   -------------------|-----------------|-----------------
   Standard           | 00              | 00              | 03
   Lower control      | 01              | 01              | 02
   Slightly warmer control | 02            | 02              | 01
   Warmer control     | 03              | 03              | 00

7) Auto restart
Enable or disable automatic system restart after a power outage.

   Setting description | Function number | Setting value
   -------------------|-----------------|-----------------
   Yes                | 40              | 00              | 01

* Auto restart is an emergency function such as for power failure etc.
Do not start and stop the indoor unit by this function in normal operation.
Be sure to operate by the controller, or external input device.

8) Indoor room temperature sensor switching function
(Only for Wired remote controller)
The following settings are needed when use the control by Wired remote controller temperature sensor.

   Setting description | Function number | Setting value
   -------------------|-----------------|-----------------
   No                 | 42              | 00              | 01

* If setting value is “00”: Room temperature is controlled by the indoor unit temperature sensor.
* If setting value is “01”: 
Room temperature is controlled by either indoor unit temperature sensor or remote controller unit sensor.

9) Remote controller signal code
Change the indoor unit Signal Code, depending on the remote controllers.

</tbody>
</table>

After completing the FUNCTION SETTING, be sure to turn off the power and turn it on again.

5. SELECTING THE REMOTE CONTROLLER SIGNAL CODE

When two or more air conditioners are installed in a room and the remote controller is operating an air conditioner other than the one you wish to set, change the signal code of the remote controller to operate only the air conditioner you wish to set (4 selections possible).

When two or more air conditioners are installed in a room, please contact your retailer to set the individual air conditioner signal codes.

Selecting the remote controller signal code
Use the following steps to select the signal code of the remote controller. (Note that the air conditioner cannot receive a signal code if the air conditioner has not been set for the signal code.)

1) Press the START/STOP button until only the clock is displayed on the remote controller display.
2) Press the MODE button for at least 5 seconds to display the current signal code (initially set to A).
3) Press the SET TEMP. (♦... Factory setting) button to change the signal code between A-b-c-d.
4) Match the code on the display to the air conditioner signal code.
5) Press the MODE button again to return to the clock display. The signal code will be changed.

If no buttons are pressed within 30 seconds after the signal code is displayed, the system returns to the original clock display. In this case, start again from step 1.

The air conditioner signal code is set to A prior to shipment. Contact your retailer to change the signal code.

The remote controller resets to signal code A when the batteries in the remote controller are replaced. If you use a signal code other than signal code A, reset the signal code after replacing the batteries.

If you do not know the air conditioner signal code setting, try each of the signal codes (A-b-c-d) until you find the code which operates the air conditioner.
6. TEST OPERATION

The outdoor unit may not operate depending on the room temperature. In this case, press the test run button on the remote controller while the air conditioner is running. (Point the transmitter section of the remote controller toward the air conditioner and press the test run button with the tip of a ball-point pen, etc.)

To end test operation, press the remote controller START/STOP button.
