Control Your Fujitsu Mini-Split From Anywhere

Remotely manage your mini-split system using a simple smartphone, tablet or PC via the Internet.

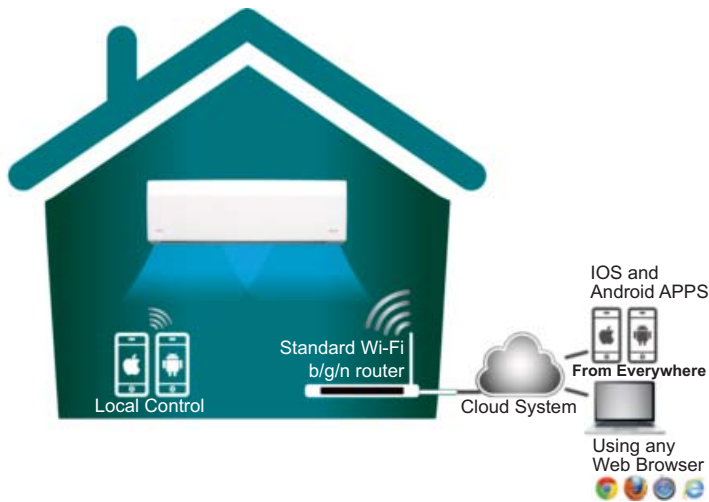

## How does it work?

- The mini-splits are controlled from a webpage or using an iOS or Android APP in a very intuitive way.
- A wireless (Wi-Fi) device installed in each unit controls the operation.
- A Server in the cloud manages the whole process.

## Features

- Turn the mini-split on before arriving home.
- Change the program if the user is arriving late.
- Know the current room temperature of your home.
- Check if the unit is still on once out of your home and turn it off.
- Program the mini-split with a calendar scheduler in an easy, intuitive way.
- Available in several languages. (Also °C and °F)
- Save money without losing comfort.
- Get instant alarm notifications.
